

Application Serial No.: 10/646,192
Attorney Docket No.: 0260257

List of Claims:**Claims 1-29 (Cancelled)**

Claim 30 (Currently Amended): A method of creating a digital home movie library, the method comprising:

receiving, using a hardware device, movie data ~~at a hardware device~~, said movie data including a video file, a plurality of audio files each in a different language, and associated metadata, wherein said associated metadata include a language attribute for each of said plurality of audio files;

storing on said hardware device said video file;

filtering said plurality of audio files based on said language attribute for each of said plurality of audio files and a user's selected language stored in said hardware device to select desired one or more of audio files from said plurality of audio files;

storing on said hardware device said desired one or more of audio files; and

discarding one or more of said plurality of audio files other than said desired one or more of audio files.

Claim 31 (Previously Presented): The method of claim 30, wherein said movie data are available for a limited time and thereafter are removed.

Claim 32 (Previously Presented): The method of claim 30, wherein said movie data are encrypted to limit the availability in at least one of the following respects: being copied multiple times, being viewed more than once, or being viewed or copied other than if conditional access is provided.

Application Serial No.: 10/646,192
Attorney Docket No.: 0260257

Claim 33 (Currently Amended): The method of claim 30, wherein said receiving is via ~~terrestially~~ terrestrially broadcast standard television signals.

Claim 34 (Previously Presented): The method of claim 33, wherein payment for viewing said movie data is made through a wireline.

Claims 35-40 (Cancelled)

Claim 41 (Previously Presented): A digital home movie library system for providing access to movies comprising:

an antenna and a tuner for receiving movie data, said movie data including a video file, a plurality of audio files each in a different language, and associated metadata, wherein said associated metadata include a language attribute for each of said plurality of audio files;

a hard disk drive; and

a processor for executing software to:

store on said hard disk drive said video file;

filter said plurality of audio files based on said language attribute for each of said plurality of audio files and a user's selected language stored in said hard disk drive to select desired one or more of audio files from said plurality of audio files;

store on said hard disk drive said desired one or more of audio files; and

discard one or more of said plurality of audio files other than said desired one or more of audio files.

Claims 42-169 (Cancelled)

Application Serial No.: 10/646,192
Attorney Docket No.: 0260257

Claim 170 (Previously Presented): The digital home movie library system of claim 41, wherein said movie data are available for a limited time and thereafter are removed.

Claim 171 (Previously Presented): The digital home movie library system of claim 41, wherein said movie data are encrypted to limit the availability in at least one of the following respects: being copied multiple times, being viewed more than once, or being viewed or copied other than if conditional access is provided.

Claim 172 (Currently Amended): The digital home movie library system of claim 41, wherein said receiving is via ~~terrestially~~ terrestrially broadcast standard television signals.

Claim 173 (Previously Presented): The digital home movie library system of claim 172, wherein payment for viewing said movie data is made through a wireline.

Claim 174 (Previously Presented): The digital home movie library system of claim 41, wherein said digital home movie library system is a set-top box.

Claim 175 (Previously Presented): The digital home movie library system of claim 41, wherein said digital home movie library system is a portable device.

Claim 176 (Previously Presented): The method of claim 30, wherein said hardware device is a set-top box.

Claim 177 (Previously Presented): The method of claim 30, wherein said hardware device is a portable device.
